

ENVIRONMENTAL POLICY

As KARAT GÜÇ and its personnel, our goal is to produce environment friendly products that comply with national and international legislations and regulations within an environmental management system based on continuous improvement.

- We promise to prevent pollution before it occurs by means of least polluting processes, not to create any danger, to decrease pollution at its source, to protect receiving environments with the use of advanced technologies, to implement methods of recycling which contributes to the country's economy
- Evaluate and control the environmental dangers, always improve our environmental performance by developing projects regarding higher risk subjects,
- Pass a clean and healthy environment to the next generations
- Use energy and natural resources efficiently
- Reduce negative environmental impacts in all processes from production to the end of life cycle
- Raise environmental awareness in our personnel and society

Within this scope, we promise to work with all our strength to become an exemplary institution through our leadership regarding environment in battery industry by managing our activities cohesively with Quality and Occupational Health Management Systems and share our environmental performance with respective parties.
